LinkedIn – [prayash sharma](#)

Summary

Motivated and technically skilled B.Tech Computer Science student at Jain (Deemed-to-be University) with strong foundational knowledge. Seeking to leverage academic training and hands-on certifications to contribute effectively to real-world technology-driven teams.

Education

B.Tech in Computer Science and Engineering

JAIN university, Bengaluru, Karnataka. Aug 2023 – Present

Diploma in Computer Engineering

Advanced Technical Training Centre , Bardang Sikkim. July 2020 - 2023

Class X CISCE

St. Augustine's School , Kalimpong ,West-Bengal. March-2020

Work Experience

Softtech Engineering Pvt. Ltd.

Jun 2024- July2024

Web Development Intern

Development and Enhancement of Municipality's Water Resources Website Contributed to the design, development, and improvement of a government website focused on managing and displaying municipal water resources. Worked on enhancing user experience, ensuring accessibility, and integrating backend functionalities to support efficient water data management and public service transparency.

Ardent Computech Pvt. Ltd.

Dec 2022- Jan 2023

Cyber Security and Ethical hacking

- Hands-on experience in cybersecurity tools and techniques.
- In depth exposure to real-world security challenges and solution.
- Practical understanding of offensive and defensive security measures
- Project on hacking android devices using metasploit framework.

Projects

Fitness Anatomy Guide

Tech Stack: React, TypeScript, Framer Motion, React Router

- Interactive anatomy-based fitness web app to explore exercises by muscle group.
- Features include dynamic muscle map, exercise filtering, chatbot assistant.
- Integrated smooth transitions and modular UI using Framer Motion.

Blockchain Based Voting System

Self-initiated project | Tech Stack: Solidity, React.js, Node.js, Hardhat, MongoDB

- Developed and deployed Ethereum smart contracts using Solidity and Hardhat to manage secure vote casting and candidate registration.
- Built a full-stack decentralized application (dApp) integrating React.js frontend with ethers.js, enabling live vote updates and MetaMask wallet interaction.
- Implemented backend voter validation system with Node.js and MongoDB to prevent duplicate voting through unique Voter ID verification.
